

What are we getting for our money? The two major items include a 30" water line from Yuba City High School down Clark to Lincoln and across to Sanborn. It will also include a new water storage and pumping station near Lincoln and Sanborn Roads. This new line is necessary in order to bring adequate water to our area.

	Existing 6-inch		Proposed 12-inch
	Existing 8-inch		Proposed 14-inch
	Existing 10-inch		Proposed 16-inch
	Existing 12-inch		T-Main
	Existing 14-inch		Proposed 24-inch
	Existing 16-inch		Proposed 30-inch
	Existing 18-inch		Proposed 36-inch
	Existing 20-inch		Proposed 42-inch
	Existing 24-inch		Existing Tank
	Existing 30-inch		Proposed Tank and Pump Station
	Existing 36-inch		Proposed Pressure Reducing Valve
	Existing 42-inch		
	Existing 24-inch pipe converted to T-Main		
	Existing 30-inch pipe converted to T-Main		
	Existing 36-inch pipe converted to T-Main		

Future Development South of Bogue Road would require the designation of a separate pressure zone.

Legend

The project has been oversized to accommodate future development. Hillcrest customers only need 22" of the 30" line. We are only paying for that portion of the project that benefits us.

A new water storage facility will be built at Sanborn and Lincoln Roads
